\*\*\*\*\* Portable ArcThemAll! Product Key is a portable file extraction utility. It's designed to extract all of your compressed archives, including: ZIP, UPX, 7Z, IMG, EXE, VHD, and more. Also, ArcThemAll! can be useful for system administrators. It can help them get all useful information from their archives and extract selected files and folders. In the list you can view the name, directory, source and result of each file. So, you can specify the output format, mode (e.g. parent folders or all files individually) and method (compression or extraction), and initiate the task by pressing the "start" button. In the "Options" area you can configure settings when it comes to the UPX (e.g. backup and verify compressed files, use ultra-brute compression method, strip relocation records), ZIP (e.g. maximum level, deflate method, encryption) and 7Z (e.g. create self-extracting archives). But you can also download plugins, as well as modify general and process options (e.g. auto-process after loading, exit program when all tasks are done, specify the output destination, integrate into the context menu, change interface language). The program uses a moderate amount of system resources and quickly finishes tasks without displaying any errors. Unfortunately, we were not able to access the program's help file. Otherwise, we strongly recommend
