For more information, please see the license agreement at Standard license: Includes AutoCAD LT, DWG/DWF format files for production and design purposes, and electronic delivery of AutoCAD technical support (via a subscription license key). Also includes electronic delivery of AutoCAD Technical Support. AutoCAD is the world's most popular commercial CAD software for professional drawing, drafting, engineering and technical drawing. It is the de facto standard for creating technical drawings and publishing them in the 2D or 3D DWG format, used for production-ready documents. DWG files are also used in other CAD applications, such as CAD modeling and CAM (computer-aided manufacturing) software. DWG files can also be viewed and edited in other graphics viewing and editing software. In 2012, the license includes AutoCAD LT, DWG/DWF files and support, which can be used for personal and production purposes. Standard support is available via telephone or electronic (e-mail) access. For an overview of AutoCAD LT capabilities, see: Pricing AutoCAD: Standard license: Includes AutoCAD LT, DWG/

The Autodesk Exchange Apps for AutoCAD Product Key 2010 were recently discontinued. An OEM program is available, which allows 3rd-party companies to sell AutoCAD as part of their products. This allows companies to sell commercial licenses (as opposed to education licenses) of AutoCAD. Autodesk provides a service for AutoCAD R12 users to upgrade to the latest release of AutoCAD. The original Trail of Heavy Artillery was developed by General Robert E. Lee at a small camp known as the Headquarters of the Army of Northern Virginia at Ashland, Virginia, on February 2, 1863, during the Peninsula Campaign. The general immediately sought to utilize the course of the Appomattox River as a base from which the army could move rapidly into Pennsylvania for a spring campaign against the Army of the Potomac's main supply base at Philadelphia. On February 6, President Jefferson Davis gave Lee the authority to lead the Army of Northern Virginia, and he proceeded to establish the headquarters of the army at Culpeper Courthouse in Orange County, Virginia. Lee established the headquarters of the Army of Northern Virginia at Culpeper, about fifty miles west of the old Army of Northern Virginia headquarters at Culpeper Court House. The city of Culpeper was occupied by the army's artillery units on February 17, 1863, and the movement of the army westward into Pennsylvania began the following day. The area around Culpeper Court House was also the home of the 2nd Virginia Cavalry Regiment, which served as the army's pioneer corps. During the subsequent Battle of Culpeper, the combined efforts of the Army of Northern Virginia's pioneer corps and the Cavalry Corps of General A.P. Hill resulted in the capture of over 2,000 Union prisoners of war. After the fall of Yorktown, the Confederate artillery moved further west from Culpeper Court House into the Shenandoah Valley, which was the base of operations for the Confederate army during its invasion of Maryland in September 1863.
