Upon completing each battle, you receive experience points in the form of Experience Points (XP) that you can use to enhance certain attributes of your character. The attributes vary from attack, defense, to creating new commands and even resurrecting fallen companions. Characters that level up by experience can increase their physical strength, increase their attack power, unlock traits that maximize the use of each type of weapon, and more. An increase in Strength and Spirit strength acts as a bonus to battle, but their increase comes at the cost of attributes such as Speed or Jump.

You can combine some of the weapon types in order to create unique weapons. By equipping a mixture of short and long weapons such as swords, axes, or maces, your attack and defense will be increased.

Armor is divided into four classes based on the amount of attributes it provides. Class 1 (S) provides increased attributes such as Strength and Jump as well as bonus attack and defense attributes. Class 2 (M) provides the opposite, extra attributes such as Speed or Jump in exchange for Strength and Spirit. Class 3 (S+M) provides bonuses to both Strength and Spirit.

The increase of attributes will be determined by the increase of class, and the increase of a certain attribute will be limited as the skill level increases. For example, S+M armor only has a maximum of 2, S3 armor
