"I just went into the store to get some candy for my sister's birthday and all I could think about was when I could play it. Riptide GP: Renegade delivers a ton of solid game play while looking fantastic and keeping me hooked." 8.5/10 - @DDuckman5 the only feasible way to locate all subprime loans on a statewide basis. The nationwide searches by the bank and later by FSLIC and FDIC appear to have been undertaken with this in mind. All other methods such as data-base searches and reliance on third-party secondary dealers would be inadequate and impracticable. If this information was critical to a particular state, it should be maintained on a daily basis in that state by the appropriate supervisor of that state's agency. 33 Section 8(e)(2) of the FSLIC Act, 12 U.S.C. 1817(e)(2) requires the FSLIC to discharge all its duties in a manner consistent with "the highest standards of business and accounting practices." This language requires that the information gathered and kept in the FSLIC files be accurate, reliable and complete. The district court's conclusion that the Bank's method of locating subprime loans for each state was adequate is well-supported by the record, but this does not end the inquiry. 34 While this standard of business and accounting practices might be adequate for the banks, the SEC's evaluation of this method would be required to reflect the specific needs of the agency. If, as the SEC suggests, there are limitations as to the extent of searches necessary for compliance with section 8(e)(2), the limitations can only be determined after a review of

the particular agency's activities and needs. We believe that the burden should be placed on the agency to prove that it has fully performed its duties within the section's mandate and not on the agency to show that it may not have performed its duties.³⁵ If the SEC, as an agency that operates with few funds, finds that its collection of information through its oversight of subprime lending in all 50 states is not adequate to assure the integrity and the usefulness of that information, it is the SEC's responsibility to find a better method, not the Bank's. The SEC has not persuaded this court that the Bank should be required to maintain a searchable computer file of subprime loans in each state and to maintain that searchable computer file continuously on a

What's new in Riptide GP: Renegade:

by Scott Rogers Hi all, it's Scott Rogers here with Renegade, a gameplay walking mission by Richard Launius and one of the three projects currently active in the E-Space Development Project. Renegade, is set in the year 927 AD, where the Terran-Meridian Alliance now consists of 8 fully equipped campaigns supported by 2 starships fully equipped with high-tech weapons. Each campaign has their own unique play-style, meaning that each of the 8 missions will be completely unique between all campaigns. In addition to that, each campaign has some very distinct areas and zones which means that a lot of focus will be put on absolutely beautiful, detailed locations. The Project has already released missions for Toro and Salvage. Now it has revealed two new locations and a new primary campaign, Renegade. The project walks through Renegade's development, the location and captured video and all the info you need to dive right into it yourself. These three parts of the Project, are Renegade FIND, the location, Renegade DEMO, which gives you a sneak peak of the location, Renegade WALK, the walking mission and finally is Renegade EXPERT, an advanced walk-through, which in detail shows how a mission should be built. After that, you'll be able to see a spotlight on Renegade and a lot of other Development Projects from the E-Space, in which I'm involved. So, if you're ready to head to Ghost Station, pull up a chair and dig in. 50,000 kilometres from Terran Meridian space, David Stern glides through the jump point. The first planet outside of Meridian space, this relatively unscathed world, once held a few thousand inhabitants before the fledgling Rodian civil war destroyed most of the larger cities and bounced the populace into the forests. He feels the ambient time slows down a bit as he nears the jump point. He wonders if his body remembers the journey well enough to cope with this energy hit again, but beyond the ten-minute delay, he's rested and ready. A few hours off-duty, he enters the portal and finds his office. A quick look to the Task Manager informs him that he is the only officer still on duty, the unit had yet to fight a single battle, though they have since scattered into the grasslands. They never fought against the Robobrain Federation, he noticed. Stern doesn't look at the
