The Hormel Food Company plans to close one of its oldest and largest pork processing plants in Austin, Minnesota, and replace it with a new facility that could cost more than \$200 million. The company said it could not finance the construction of a new plant on its existing site for the new pork production system. Through an agreement with the state, the company will pay off its existing plant and lease the land. The company plans to pay rent to the state and create 52 jobs at the plant in the first phase of construction. Hormel said its pork plants at the 6,700-acre site close at the end of 2016 and its production schedule will not change. About 1,100 jobs were affected by the closure and the new plant will have an approximately 2 percent increase in capacity. The Minnesota Pork Producers Association said the jobs in Austin are the largest in the state and provides the entire southeast region of the state with a ready source of lean pork products. "Austin is the largest employer in the state of Minnesota, and Hormel's announcement will have a significant impact on the state's economy," said association executive director Ralph DeMoura. "Many small family farmers are small businesses, and they are closely tied to customers who rely on Hormel pork." De

**Online Play** A large-scale collaborative effort where multiple players simultaneously play on the same server as their team. Synchronize with players in a variety of ways:

- Players can synchronize in real-time, allowing everyone to enjoy the same action.
- Players can also synchronize with their data or items, allowing them to use them in the same room as their friends.
- Players can synchronize the "data between" items, allowing a person to use a weapon, armor, or other item that they are carrying on their person even if they are not in the same room as the player who is holding the item.

**Asynchronous Online Play** A small-scale collaborative effort where a single player plays the game alone on a separate server. "Date" Players can "date" each other and participate in a shared world together while being in different states. Fully support sending and receiving photographs between "dates" and changing the position of the other party.

**Arts Online Playing** by allowing only certain characters to

**Q: How to disable sudoers from getting locked by zabbix-agent when installing? I have an issue with zabbix-agent (linux) getting locked by sudoers when running setup.sh. Root can't execute this script. The zabbix-agent install script can lock your root account when it's not done using sudo I have no idea how to correct this as I have no idea what the cause and effect is. All I have done is install zabbix-agent (which yes can really do alot) Is there anything I need to change in sudoers to stop it locking root? I have verified my user on zabbix is still on the sudoers list**

**A: EDIT: klop referred to an example in the zabbix-agent FAQ page. Which turned out to be an example of a server which had the same issue. I fixed the bug within an hour. korenCx mentioned in comments to the question that the zabbix-agent binary (which is what I was using to install zabbix) uses chown to make itself owned**

### **System Requirements:**

**Each player needs to have an active, permanent internet connection (for example, either a DSL or cable connection) and an AIM, MSN, Yahoo, Jabber, ICQ, Google Talk, Google Talk or similar provider account. Signing up for an account isn't required, but it's recommended. The reason for this is that you'll be able to communicate with your fellow players. It is not necessary to join an alliance, and it is not possible to arrange a private tournament or similar with other players.**

**As a rule of thumb: If**
