How to use swiftmailer? How to
use swiftmailer in laravel 5.2? A: If
you are using Laravel 5.2 then all
you need to do is this.. Install the
package composer require
swiftmailer/swiftmailer We also
need to run this in console php
artisan cache:clear Restart your

application using.. php artisan
serve Open your laravel directory
in browser. Then visit
localhost:8000. Create an Account
Once you are logged in, you can
create an account using register, if
you have already created an
account then just login to your
account. To login Go to Once you
login to your account you can click
on your profile and there you can
download your previously saved
password for logging in. Visit Post
to download your email ID After
logging in, visit this link There the
email will be available for you to
download. Send Mail Now, you can

send a mail to any user by clicking on this link Important The above instructions are for the new laravel version 5.2, where you can easily configure email in config/mail.php file and you can also configure the settings for your mail service. I hope the above will help you.. A: It's quite simple. You just need composer! Step 1 Composer is available on almost every linux distribution. To install composer you need to install PHP. Step 2 Then you need to install composer on your computer. You can visit here. Step 3 After that you need to create composer.json file. It's very
